A woman with long blonde hair, wearing a light pink floral dress, is riding a blue and white bicycle. She is smiling and looking back over her shoulder. The bicycle has a black basket on the handlebars. She is riding through an ornate black iron gate. The background is a lush green park with trees and grass.

MAKE YOUR LIFE EASIER WITH NICE

AUTOMATING GATEWAYS IS SIMPLE,
FAST AND INCREASES SECURITY

Nice

NICE: THE BEST DESIGN, THE BEST INNOVATION!

Easy, convenient and **practical** solutions
for automatic gate and garage door systems,
to improve your **well-being** at home.

Nice always gives you more.

**MADE
IN ITALY**

THE RIGHT ANSWER FOR A COMPLETE AUTOMATION SYSTEM

1. Radio controls

have one or more channels memorised with the commands on the control unit and they're powered by an internal battery. **Transmitters must be combined with a specific receiver** which is equipped with one or more channels to receive the signals.

2. Motors

act on the gate or garage door to enable movement. They can be single or double, underground or externally mounted.

3. Photocells

enable obstacle detection sending a signal to the control unit, which blocks automation movement via the motors. Photocells guarantee improved safety with respect to manual versions.

4. Switches

Digital or key-operated selectors to activate automation, via cable or radio, also with proximity reader.

5. Control units

contain the electronics for the motor control. They can be external and connected to one or two motors, or integrated in the motor itself. The unit acquires the signals sent and can have the built-in radio receiver.

6. Flashing lights

indicate all gate and door movements, increasing visibility and safety.

QUICK GUIDE

SWING GATES

**DISCREET UNDERGROUND INSTALLATION,
THE FINEST SOLUTION IN TODAY'S MARKET!**

**Motor for gate
with leaf up to 5 m.**

Fab Family

**It blends in perfectly
with any architectural style,
new and existing gateways.**

No apparent sign of the mechanism
other than the lid of the foundation
casing box. It does not detract from
the overall aesthetics of an attractive
gateway. Designed to operate in damp.

Available in practical
and complete kit solutions.

X-Fab
up to 2.3 m

L-Fab
up to 4 m

M-Fab
up to 3 m

Big-Fab
up to 5 m

Nice

**THE RIGHT CHOICE
IN EXTERNAL INSTALLATION!**

**VERSATILE INSTALLATION,
WITH ARTICULATED ARM!**

**Motor for gate
with leaf up to 7 m.**

Wingo and Toona

**Extremely strong and able
to cope with heavyweight gates.**

Very useful for a pair of closed-in
gates in an exposed
position, where the force
of the wind will pose no problems
to the strength of the motor.

**Wingo
up to 3.5 m**

**Toona
up to 7 m**

**Motor for gate
with leaf up to 3.5 m.**

Hopp and Hyke

**The most versatile option
with articulated arm,
designed to automate gates
that are hung from large brick
or large stone pillars and lightweight
structures.**

Safe thanks to the anti-shearing arm,
easy to install with the new fixing brackets.

**Hyke
up to 3.5 m**

**Hopp
up to 2.4 m**

Available in practical
and complete kit solutions.

Nice

SLIDING GATES

**STURDY AND POWERFUL AUTOMATION,
FOR INTENSIVE USE!**

**Motor for gate weighing
up to 1000 kg.**

Robus

Perfect and safe movement,
with obstacle detection system.

Sturdy die cast components,
with easy to open and practical handle.

**Motor for gate weighing
up to 2500 kg.**

Run

Suitable to operate for intensive use.

Safe in movement: acceleration and
deceleration settings are precise and reliable.

Very quiet operation. Long lasting die-cast aluminium.

Available in practical
and complete kit solutions.

Nice

MORE SAFETY

**DISCOVER THE SIMPLICITY OF SAFETY WITH NICE PRODUCTS,
TO ENSURE TOTAL COMPLIANCE WITH CURRENT STANDARDS**

- Resistive and mechanical sensitive edges
- Positionable synchronised photocells
- Facilitated release system
- Obstacle detection and phototest to prevent manoeuvre in event of faults
- 24 V power supply and rechargeable batteries to enable operation of the motor also in the event of a power failure
- Fast, strong and utterly reliable systems thanks to diecast components

All Nice products comply with the European Directives governing safety (EN Tested).

Nice products can be easily certified on site by installers through inspections, checks and tests to ensure compliance with the highest standards.

The Nice professional installer provides you a special service to complete all tasks required by the Safety Directives.
