BUILDING PRODUCTS COMPANY

SINCE 1984®

With today's demanding lifestyle and frenetic pace of living it is no surprise that most households enjoy precious little spare time. Bearing this in mind Remco have developed an extensive range of pool cover products that help minimise the effort spent working on your pool and maximise the time you can spend in and around your pool... relaxing!

Swimroll

Inspired by their European counterparts Remco has developed an Australian pool cover which provides the very best in functionality and performance.

Swimroll pool covers are constructed of high-grade PVC or Polycarbonate extrusions, which interlock tongue in groove. The panels are hollow, ensuring high buoyancy while providing insulation to the pool water. Completely sealed, the panels create a floating floor on the surface of the water and are fitted into the internal shape of the pool. In some instances, they can be adapted to suit varied pool shapes. Owners using the cover as an additional safety barrier will have the cover floating above a specially constructed safety ledge 50 mm wide (in new pools). A stainless steel safety handrail can be installed into existing pools to provide the same benefits.

The Swimroll automated pool cover rolls onto the pool at the press of a button or via a remote control, providing even greater convenience. The self cleaning mechanism removes any debris from the cover as it rolls away. Heating costs can be reduced by up to 80% with this cover providing exceptional insulation qualities.

In Australia, all these Swimroll pool covers do not replace the need for a safety fence around your pool. Parental supervision is always recommended for children in the vicinity of any body of water. Swimroll is not to be relied upon as the sole safety mechanism in a pool environment.

Swimroll automated pool cover systems can be:

- customised - adjustments are made during installation to ensure a smooth, snug fit
- below ground - a stylish, concealed roll-up mechanism can be specified prior to pool construction
- above ground - a range of pool deck mounts offer multiple design alternatives.

SWIMROLL INSTALLATION

Each Swimroll pool cover is individually made and fitted according to the final laser-light pool measurement. As such, Swimroll is customised to the particular pool and adjustments are made at installation to ensure a smooth and easy fit.

SWIMROLL MANUFACTURE

Swimroll pool covers have been exclusively manufactured in Australia since 1989 by Remco. The pool cover and operation mechanism is manufactured in a purpose built factory in Melbourne, Australia.

SWIMROLL WARRANTY

Swimroll pool covers carry a 5-year warranty. You can be assured of premium quality and excellent performance.

SWIMROLL CONTROL OPTIONS

Swimroll pool covers are available with three practical control options, designed for ease of use and security:

- Push-button
- Key switch control: provides owner with a lockable option
- Remote control: total ease of use
- Home Automation Compatible - for completely integrated operation.

SWIMROLL COLOURS

Swimroll pool covers are available in seven colours: Rock Grey, Pebble Stone, Limestone Yellow, White, Solar Black Polycarbonate, Clear Polycarbonate and Transparent Polycarbonate.

NB: the Swimroll colours displayed are for illustration purposes only. Please request a physical sample before ordering.

PoolGuard

The perfect cover for new or existing pools and the latest innovation in swimming pool safety, PoolGuard is a durable, multifunctional cover that provides protection with peace of mind.

Constructed from cross woven, UV treated PVC coated polyester, PoolGuard is stabilised by anodised aluminium tubes that span the width of the cover, making it strong enough to support the weight of an adult. Correct application makes your pool completely impenetrable, protecting both children and pets.

In Australia at this time PoolGuard pool covers do not replace the need for a safety fence around your pool. Parental supervision is always recommended for children in the vicinity of any body of water. PoolGuard is not to be relied upon as the sole safety mechanism in a pool environment.

POOLGUARD: COMPLETE WASTE PROTECTION

- 100% protection from leaves and debris
- Allows for quick and easy removal of leaves and debris from the cover surface before retraction with a garden blower or broom
- Spend less time vacuuming and more time enjoying your pool.

POOLGUARD: HEAT / WATER / CHEMICAL RETENTION

- Eliminates evaporation
- Brilliant insulation. The thick air layer beneath the cover ensures minimal heat loss
- Saves energy and money
- Helps to maintain consistent chemical readings
- Ensures lower water and chemical consumption costs.

POOLGUARD: OPERATION

- Easy geared rolling mechanism allows for single person operation
- Motor assisted roll-up mechanisms also available
- Forms a compact lightweight roll at the end of your pool – under 30cm diameter!
- Can be left stationary, unclipped or relocated and stored.

POOLGUARD: INSTALLATION

- Unique design allows quick effective installation
- Lockable
- Six point anchoring using self-sinking stainless steel connections.

POOLGUARD: COLOURS

Coverstar

Coverstar is the only fully automated pool cover suitable for free-form pools.

Coverstar is a multifunctional pool cover which is securely fixed into parallel tracks. Operated using a key switch, this rectangular shaped, vinyl cover rolls on effortlessly to seal out dirt, dust and leaves while reducing chemical usage by up to 70%. Pool heat is maintained, providing significant savings on heating costs.

COVERSTAR: A SAFER POOL

Key switch can be integrated into a lockable box to prevent unauthorised access.

COVERSTAR: FULL AUTOMATION

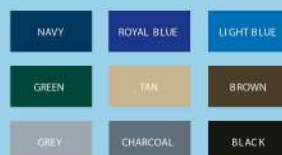

It's quick and effortless. The pool cover is opened or closed in minimal time.

COVERSTAR: SEAL'S OUT DIRT, LEAVES AND DEBRIS

No mess, no fuss with Coverstar automatic pool cover!

COVERSTAR: HEAT, WATER & ENERGY COST SAVINGS

Coverstar maintains heat and chemicals by stopping evaporation. It prevents up to 90% of pool water evaporation, enabling savings of up to 70% on pool heating costs. Pool filtering cycle times can also be dramatically reduced, (over 50%) providing further savings on electricity. Instead of filtering a pool 8-10 hours a day for an uncovered pool, just a few hours is all that is typically needed.

NB: the Coverstar colours displayed are for illustration purposes only. Please request a physical sample before ordering.

WHY CHOOSE PROTECTORS?

Protectors is Pakistan's market leading manufacturer of motorised, automated and multifunctional pool covers. Our pool covers keep pools child safe, clean and beautifully warm all year round. Pool covers save our precious water and are environmentally friendly, dramatically reducing chemical and energy usage. Heating is suddenly affordable with Protector's pool covers! Safety covers, vinyl covers and automatic and manual rollers are available. Protector's pool covers can in many cases be customised to fit shaped pools.

THE SAFETY ASPECT

Imagine this: Your child is playing in the back garden. The ball he's playing with, accidentally gets thrown into the nearby swimming pool. That's no big deal he thinks: "I'll just hop in and get it". Moving his play ladder closer he begins to climb over the fence, and the rest, is history. This simple scenario is more common than you may think. In fact, research shows that pool related instances involving child death continue to be unacceptably high. Swimroll, PoolGuard and Coverstar are revolutionary products that cover the entire pool in seconds. Their unique construction allows a small child to walk on them without giving way underneath, providing life-guard protection to the ones you love, 24/7.

PROTECTOR'S POOL ENCLOSURES

We also manufacture a range of Swimming Pool Enclosures (also known as pool dome, pool building, retractable roof, automatic roof or telescopic pool enclosure). Structures that turn an outdoor pool into an indoor pool and can be easily opened by one person, either manually or electrically.

The semi-separate elements stack, telescopically into each other in a most compact way, leaving the "outdoor pool feel" when the weather is fine. During the Autumn, Winter and early Spring period the enclosure can remain closed, allowing the user to enjoy the pool all year around. They keep out all leaves, dirt and debris, and assist in heating the pool, greatly reducing heat loss.

These enclosures can be equipped with childproof locks ensuring child and pet safety. Many other applications are possible for this type of structure, eg. sunroom, veranda enclosure, restaurant al fresco area enclosure, river cruise boat enclosure or greenhouse. We can design a purpose built structure for you.

In Australia at this time Coverstar pool covers do not replace the need for a security fence around your pool. Parental supervision is always recommended for children in the vicinity of any body of water. Coverstar is not to be relied upon as the sole safety mechanism in a pool environment.

Protectors Pool Covers

Aesthetically pleasing, pool covers are multifunctional, automated or motor-assisted and, at the push of a button, ready for use. Our covers can help your pool stay sparkling clean, retain heat, stop evaporation and most importantly, prevent accidental drowning.

Savings on energy costs virtually pay for the cost of the cover and you'll enjoy the added bonus of being able to use the pool all year round. Swimroll, PoolGuard and Coverstar provide peace of mind, making your pool area a much safer place for children and pets.
